Seeking Qualified Candidates for

Stationary Engineer

RegionalSan.com

Stationary Engineer

Regional San is currently hiring for these positions:

Stationary Engineer I

\$38.91 - \$42.90 Hourly*
\$81,244.08 - \$89,575.20 Annually

Stationary Engineer II

\$42.90-\$47.30 Hourly*
\$89,575.20 - \$98,762.40 Annually

Senior Stationary Engineer

\$42.80 - \$52.03 Hourly*
\$89,366.40 - \$108,638.64 Annually

**Differential compensation may apply to qualified employees, see labor agreements for details.*

Stationary Engineers at Regional San are responsible for ensuring continuous operation of heating and ventilation systems throughout the Plant, laboratory, and conveyance system. Specific duties include:

- Operate, maintain, repair, replace and troubleshoot boiler, steam turbine, and chiller systems and associated equipment in both process and non-process areas.
- Operate, maintain, repair, replace, troubleshoot HVAC & air handling systems.
- Monitor and respond to PCC SCADA and Johnson Controls computer systems that monitor and control air handling, temperature, and ventilation needs throughout Plant and laboratory.
- Coordinate operational needs between Plant boiler chillers and Cogen facility.

These positions perform highly skilled and specialized work in the operation, maintenance and repair of stationary and industry specific equipment such as hydronic/heating/cooling/air conditioning systems.

Refer to job specifications for additional details.

Education and Experience

Stationary Engineer I

- 2 years full-time experience operating, maintaining, repairing, and installing heating, ventilating, air conditioning, refrigeration, power systems, water treatment, fire life safety systems, or water and steam pressure boilers; or
- A certificate or higher in Mechanical-Electrical Technology from Sacramento City College, or other accredited college or career school which has comparable curriculum; or
- A certificate of completion from a Federal/State approved Stationary Engineer apprenticeship program.

Stationary Engineer II

- 2 years full-time experience employed by the County of Sacramento in the class of Stationary Engineer I; or
- 4 years full-time experience operating, maintaining, repairing, and installing heating, ventilating, air conditioning, refrigeration, power systems, water treatment, fire life safety systems, or water and steam pressure boilers.

Senior Stationary Engineer

- 1 year full-time experience employed by the County of Sacramento in the class of Stationary Engineer II; or
- 5 years full-time experience operating, maintaining, repairing, and installing heating, ventilating, air conditioning, refrigeration, power systems, water treatment, fire life safety systems, or water and steam pressure boilers.

About Regional San

Regional San owns and operates the regional wastewater conveyance system and the 1,000 acre Sacramento Regional Wastewater Treatment Plant (SRWTP), near Elk Grove, California. The conveyance system consists of a network of 169 miles of interceptor pipelines and 11 large pump stations that convey wastewater to the SRWTP. The SRWTP is one of the largest wastewater treatment plants on the west coast.

Regional San is undertaking a \$1.5 billion effort - called the EchoWater Project - to take our region's wastewater treatment to a whole new level. When completed, the EchoWater Project will be capable of meeting our region's needs and protecting our region's waterways for generations to come.

This is an opportunity to be a part of a growing organization, participate in a team atmosphere, and work on a variety of hydronic systems, pumps, condensers, and compressors. To learn more, visit RegionalSan.com.
