TRAINING

PART 1 -- GENERAL

1.01 DESCRIPTION

- A. The Supplier shall make available experienced factory-employed representatives of the manufacturers to provide training for the District's personnel in the operation and maintenance of the valves and actuators.
- B. The manufacturer representatives for operations instruction shall be factory-trained, have a minimum of two years of experience at the manufacturer's factory, and shall be experienced in the installation, operation, startup, and troubleshooting of the valves and actuators.
- C. The manufacturer representatives for maintenance instruction shall, at a minimum, be factory-trained service technicians with a minimum of two years of experience at the manufacturer's factory. The time required for this training shall be as specified for the systems or equipment items.
- D. Qualifications of the individual(s) providing the training shall be provided with the lesson plan submittals.
- E. The number and duration of the vendor training sessions shall be one (1) two-hour (minimum) training session for each size of valve and actuator type provided.
- F. In accordance with the OPERATION AND MAINTENANCE DATA Section (01 78 23), the Draft vendor equipment O&M manuals shall be used as the principal basis for instruction in the training described herein. The vendors shall review contents of the Draft O&M manuals with personnel in detail to explain all aspects of operation and maintenance. The vendors shall prepare and insert data into the O&M manuals (i.e., submitted with the Final O&M manual) when the need for such data becomes apparent during instruction.
- G. Vendor training shall consist of a combination of both classroom and field training. Due to the short time period to install the valves (48 hours), all training will be completed prior to installing the valves.

1.02 SEQUENCE

- A. Coordination and scheduling of the training sessions with District staff shall be initiated immediately after the District issues the Purchase Order for the valves. The District's
