SCOPE OF WORK

1. Runoff zone liner cleaning

Contractor shall clean the runoff zone polypropylene geomembrane liners at Lined Dedicated Land Disposal (LDLD) 3 at the Sacramento Regional Wastewater Treatment Plant (SRWTP), 8521 Laguna Station Road, Elk Grove, California 95758. Cleaning shall include, but not limited to, removal of all dirt, mud, sand, harvested sludge, grass weeds, and other miscellaneous vegetation and debris. Cleaning shall include all areas of the runoff zone liners, including the floors and the sloped areas.

Please refer to the site map, photographs, and drawings of LDLD3 runoff zone (Attachment 1, 2, and 3).

Please also refer to the Maintenance Manual for the LDLD3 runoff zone liners (Attachment 4) for procedures and precautions when cleaning the liners, as well as descriptions of liner materials.

Contractor's bid will include a work plan detailing the equipment and methods to be used for cleaning the LDLD3 runoff zone liner. Contractor shall provide all equipment necessary for removal of materials from the runoff zone and conveyance to the adjacent LDLDs, or disposal off-site.

2. Protection of the liners, damage, and repairs

It is of utmost importance that the liners not be damaged, including, but not limited to rips, tears, and punctures. This LDLD liner material and precautions against damaging it are described in the Maintenance Manual in Attachment 4.

The contractor will be responsible for all damage to the liners incurred during cleaning. The District will inspect the liners after they are cleaned, on or about August 31, 2022 (see "Key Action Dates" in the RFB). Contractor will make repairs to the liners, as directed by the District, during the period for repairs between August 31, 2022 and September 30, 2022. Repairs shall be made as described in the Maintenance Manual (Attachment 4).

The following precautions are from the Maintenance Manuals in Attachment D. Contractor shall conduct operations in accordance with these precautions.

Only rubber soled shoes should be used on the polypropylene liner. The soles shall be inspected prior to entrance onto the liner for embedded sharp objects such as metal shavings, rocks, glass, thorns, etc.

Extra care is to be taken in the implementation of cleaning and maintenance processes to avoid damage to the liner. All equipment such as shovels, pumps lights, blowers, vacuums, etc., shall have the bottom padded to prevent damage to the liner. All pumps and equipment should not have sharp projections or edges on them that may puncture the liner. Sharp edges on tools shall be removed and or padded. Gasoline, oils or other petroleum products should never be allowed to contact the polypropylene liner material. No metal brooms or shovels are to be used for the cleaning of the liner. The following methods are allowable:

Sacramento Regional County Sanitation District
RFB#8418 Lined Dedicated Land Disposal (LDLD) 3 Runoff Zone Liner Cleaning Project

- *Manual sweeping and pickup*
- *Water wash down (low pressure)*
- *Plastic grain shovels or plastic snow shovels*
- *Other approved non-damaging methods.*

Dirt residue and other deposits can be removed from the liner by washing with a hose and letting water flow to the drain (sump). During cleaning remove water in certain areas by submersible pump and by broom and/or squeegee to facilitate rapid cleaning and draining of water off the liner.

It is not recommended that the liner be walked on when wet. All persons going onto the liner should be advised that the liner will be very slippery when wet and to take extra care and precaution to protect against slippage.

3. Use of power equipment

The O&M Manuals (Attachment D) do not mention the use of power equipment to clean the runoff zone liners. Contractor may propose the use of power equipment that in their judgment, after viewing the liners during the Pre-Bid Meeting on May 3, 2022, will not damage the liners. In such case, Contractor will explain in their bid why the power equipment will not cause damage to the liners, including but not limited to cuts, tears, punctures, and abrasion. Approval of the use of such equipment will be at the sole discretion of the District.

4. Disposal of dirt, mud, harvested sludge, grasses, weeds, and miscellaneous debris

Dirt, mud, harvested sludge, weeds, grasses, and other vegetation removed from the runoff zone liners may be placed on the adjacent LDLDs in areas designated by the District. These areas will be within approximately 5- feet of the adjacent edge of the LDLD.

Miscellaneous debris such as paper, cardboard cans, and rocks shall be removed from the runoff zone liners. It is the responsibility of the contractor to dispose of such materials off-site. Contractor shall be responsible for all hauling and disposal of all such material, including providing disposal containers, if needed. Disposal of all material removed from the LDLD runoff zone liners shall be as indicated and approved by the District, and shall be in accordance with all local, state, and federal laws.

Each runoff zone has a sump to receive water runoff. The sumps should not receive grasses, weeds, and other vegetation because these materials could clog underground drain lines. During the project, the sump gate in each basin will be adjusted by District staff so that it is slightly raised. In this position, it will allow water to flow over it while not allowing the passage of mud, dirt, and other materials. Contractor will propose other measures, such as the placement of straw wattles, which will minimize the flow of dirt, mud, harvested sludge, weeds, and grasses into the sumps. Contractor will provide and place any such materials as approved by the District.

5. Temporary utilities

Contractor shall furnish all equipment and required temporary power and wining in accordance with local, state, and federal regulations and codes, and as required to complete the cleaning operation.

Sacramento Regional County Sanitation District

RFB#8418 Lined Dedicated Land Disposal (LDLD) 3 Runoff Zone Liner Cleaning Project

The contractor shall provide temporary sanitary and working facilities for its employees, including potable water and sanitary drinking cups, enclosed toilet facilities, trash receptacles, and appropriate first aid facilities.

Piped water is not available at the LDLD runoff zones.

A water station for the filling of water trucks is available at SRWTP.

6. Contract schedule

Full and complete cleaning of the runoff zone liners from start to finish including acceptance by the District shall not exceed the schedule provided in the section titled “Key Action Dates” in the RFB

7. Acceptance of work

All cleaning services provided shall be inspected before acceptance by the designated District representative for conformance to all requirements of this specification. Should deficiencies be found, including inadequately cleaned areas, or rips, tears or other damage to the liners, it shall be the responsibility of the Contractor to correct the deficiencies in question, make necessary corrections, and then resubmit for inspection and acceptance at no additional expense or obligation to the District.

8. Safety

The contractor shall be responsible for the safety of their employees at all times. Contractor shall be responsible for providing and for the placement of barricades, traps, plastic, flag tape, and other safety/traffic control equipment required to protect its employees, surrounding areas, equipment and vehicles. Contractor should be aware that the LDLDs are injected with harvested sludge (i.e., stabilized sludge or biosolids), and the mud and dirt that have run off from the surfaces of the LDLDs contain harvested sludge. Surfaces of the LDLD runoff zone liner may be slippery, especially when wet.

The flow of vehicular traffic shall not be impeded at any time during cleaning.

The contractor shall provide required Personal Protective Equipment (PPE) for its employees.

9. Housekeeping

The contractor shall keep the premises clean of all rubbish and debris generated by the work involved and shall have the premises neat and clean. All surplus material, rubbish, and debris shall be cleaned at the end of each work day. All materials, tools, equipment, etc. shall be removed or safely stored. The District is not responsible for theft or damage to Contractor’s property. All possible safety hazards to works immediately and left in safe condition at the end of each work day. If there is a question in this area, the designated District representative shall be consulted.

10. Air quality

If using a gas or diesel-powered generator for power supply, the equipment must be certified by the California Air Resources Board. The contractor is responsible for keeping track of the hours the generator is in operation.

Dust generation must be minimized. SRWTP has received a warning from the Air Quality Management District concerning dust clouds from LDLD operations.

Safety and Submittal Requirements

Work must be coordinated through the SRWTP Access Request process (Attachment 1). The contractor's work must be performed within CAL OSHA requirements. Additionally, the contractor will be required to submit a project specific safety plan.

Proposals shall identify general safety considerations that will be implemented by the contractor for the work. The contractor must identify the safety lead that will be present for the work in their proposal and include their resume as part of the Related Experience proposal section.

subcontractors, for labor or materials, the Board may give written notice of at least 5 calendar days to the Contractor and sureties that if the defaults are not remedied within a time specified in such notice, the Contractor's control over the work will be terminated.

If the Contractor should be adjudged bankrupt, or make an assignment for the benefit of creditors, or if a receiver should be appointed on account of insolvency, the Board may declare the Contractor's control over the work terminated, and so notify the Contractor and sureties.

Upon such termination, the Board may direct the Engineer to take possession of and use all or any part of the Contractor's materials, tools, equipment and appliances upon the premises to complete the work; Regional San assuming responsibility for the final relinquishment of such equipment at the conclusion of the work, or sooner, at its option, in as good condition as when it was taken over, reasonable wear and tear excepted, and Regional San agrees to pay for such materials and the use of said equipment a reasonable compensation to be mutually agreeable to the Board and the Contractor.

If the sum so expended exceeds the unpaid balance, the Contractor and surety are liable to Regional San for the amount of such excess. If the surety completes the Work, such surety shall be subrogated to money due under the Contract and to money which shall become due in the course of completion of the surety.

Regional San may, without prejudice to any other remedy it may have under the provisions of the Contract, terminate this Contract, in whole or in part, at any time by giving written notice to Contractor or its representative by certified mail, return receipt requested. Termination shall be effective upon receipt of notice by Contractor.
